

## QUALITY POLICY OF CELESTIA SATELLITE TEST & SIMULATION BV

As Celestia Satellite Test & Simulation BV (C-STS) we provide innovative high-tech solutions for ground-based systems for satellite simulation and testing as well as modem (satellite communication) products and data processing systems.

**Our fundamental goal is creating added value by Customer satisfaction. It is achieved through Teamwork and Flexibility.**

**We continuously review our performance to ensure our objectives are met and that these are adequate to satisfy our customers. Our core quality goals are:**

- **Exceeding Customer Expectations** by delivering the highest quality product, systematically monitoring and developing our activities and supply chain.
- **Being innovative** by developing scalable, flexible and reusable products and solutions utilising the latest state of the art technologies and recognised engineering methodologies. The principle goal being the expansion of the C-STS product portfolio leading to a wider customer and deployment base.
- **Maintaining partnership** by working in partnership with our Suppliers, Customers and Partners to encourage innovation and to improve relationship to our mutual benefits.
- **Investing in staff and facilities** by staff development, training and investment in engineering tooling to support product development and company level expansion.

Our Quality Management System is understood and followed by every team member in the organization.

We maintain and continuously improve the effectiveness of our quality management system based on ISO 9001:2015 requirements.
