

## Job Opportunity: Senior Project Manager

**Celestia Satellite Test & Simulation BV (C-STS) provides innovative high-tech solutions to the international space community to support spacecraft development, Assembly Integration and Test (AIT) as well as post launch and operational services. C-STS operates from Noordwijk, The Netherlands.**

### **What we do:**

Our core activities include the design, development and delivery of complex electronics-based products:

- EGSE – electrical ground support equipment used to simulate and test satellite sub-system interfaces
- TT&C – telemetry, tracking & command equipment used to communicate with satellites in space
- Optical Digital Converters – a sub-system of optical ground stations enabling data retrieval from satellite sent to ground via laser communication means

For more information about our company, our products and activities have a look at our website: [www.celestia-sts.com](http://www.celestia-sts.com).

### **Who are we looking for:**

Due to company's current growth we are searching for a **Senior Project Manager**. Our new colleague will be responsible for all programmatic aspects of one or multiple projects throughout their complete project lifecycle.

As a Senior Project Manager we expect you enhance the current structure within the project management team with focus on planning, budget, safety and quality. In this role you will be responsible for facilitating, stimulating and coaching the Project Managers in the team. Good communication is therefore an important attribute required for this position. We are looking for a Project Manager who is ready for the next step in leading a small team. Our current project team consists of three Project Managers.

### **What will be your challenges:**

- Preparation of Project Management/Development Plans
- Creating and maintaining project planning for new and currently running projects at C-STS
- Assigning and monitoring task progress via regular team meetings, etc.
- Controlling and monitoring project costs
- Management of sub-contractors (as required)
- Direct interfacing to customers for all programmatic aspects
- Co-ordinating activities within the project teams and reporting status to higher management
- Participating in customer reviews
- Providing input to procurement and production processes
- Identification of potential roadblocks within the projects and escalating as required
- Maintaining of project risk registers
- Providing inputs for proposals/bids as required

### **What we ask from you:**

- Qualification in computer science, aeronautics or electrical engineering (BSc. or higher)
- Three years of relevant experience as Project Leader/Manager in an (electronic systems) engineering organisation
- Ready for the next step in leading a small team
- Experience in management of subcontractors
- Experience in system development projects and the co-ordination of multi-disciplinary development teams
- Good organisational and communication (written and verbal) skills, for which fluency in English is required
- Experience in formal ESA documentation requirements and workflow according to ECSS would be an advantage

### **We offer you the opportunity to:**

- Work in a company that is widely recognised as 'best-in-class' in the fields in which it operates
- Work together with a bright team of like-minded people, consisting of hardware, firmware and (embedded) software engineers

- Work on challenging projects, growing your own skills and experiences along the way
- Work within the Space Industry and learn about satellite onboard equipment, such as the interfaces and protocols

For a practical and motivated individual, this position will offer an exciting challenge where you can contribute directly to the growth of this quality-driven, dynamic organization.
