

Job Opportunity: Project Manager

Celestia Satellite Test & Simulation BV (C-STC) provides innovative high-tech solutions to the international space community to support spacecraft development, Assembly Integration and Test (AIT) as well as post launch and operational services. C-STC operates from Noordwijk, The Netherlands.

What we do:

Our core activities include the design, development and support of high-complexity electronics-based systems. These include products for Satellite Simulation & Test (Electrical Ground Support Equipment), TTC & TM/TC Systems, Modems (RF and Optical) as well as Data Processing Systems.

For more information about our company, our products and activities have a look at our website: www.celestia-sts.com.

Who are we looking for:

Due to company's current growth we are searching for a **Project Manager**. The individual will be responsible for all programmatic aspects of one or multiple projects throughout their complete project lifecycle.

What will be your challenges:

- Preparation of Project Management/Development Plans
- Creating and maintaining project planning for new and currently running projects at C-STC
- Assigning and monitoring task progress via regular team meetings, etc.
- Controlling and monitoring project costs
- Management of sub-contractors (as required)
- Direct interfacing to customers for all programmatic aspects
- Co-ordinating activities within the project teams and reporting status to higher management
- Participating in customer reviews
- Providing input to procurement and production processes
- Identification of potential roadblocks within the projects and escalating as required
- Maintaining of project risk registers
- Providing inputs for proposals/bids as required

What we ask from you:

- Qualification in computer science, aeronautics or electrical engineering (BSc. or higher)
- 3 years of relevant experience as project leader/manager in an (electronic systems) engineering organisation
- Experience in management of subcontractors
- Experience in system development projects and the co-ordination of multi-disciplinary development teams
- Good organisational and communication (written and verbal) skills, for which fluency in English is required
- Experience in formal ESA documentation requirements and workflow according to ECSS would be an advantage

We offer you the opportunity to:

- Work in a company that is widely recognised as 'best-in-class' in the fields in which it operates
- Work together with a bright team of like-minded people, consisting of hardware, firmware and (embedded) software engineers
- Work on challenging projects, growing your own skills and experiences along the way

For a practical and motivated individual, this position will offer an exciting challenge where you can contribute directly to the growth of this quality-driven, dynamic organization.

This role is limited to applicants currently based in Europe and legally authorized to work in the EU/EEA. We appreciate your understanding.
